# ROCKWELL AUTOMATION INDIA PVT. LTD.

## ABOUT US

Innovation, Productivity, and Sustainability

### GLOBAL LEADER IN INDUSTRIAL AUTOMATION

Rockwell Automation India Pvt. Ltd. is the largest company in the world that is dedicated to industrial automation and digital transformation. Across the globe. Rockwell Automation India Pvt. Ltd., integrates advanced technology with domain expertise to optimize industrial operations. Their services simplify product development, automate processes, and enhance cyber security. Acquisitions like Kalypso and Verve bolster our Capabilities, making us the industry's trusted advisor.

We meet customers where they are in their journey with market leading hardware, software, and services to make them more resilient, agile, and sustainable.

Rockwell Automation has a strong focus on Corporate Social Responsibility (CSR) in India, particularly in areas like Education, Sustainable Manufacturing, Development & Educational Infrastructure and Resources in Rural areas, like Smart Classrooms and Sanitation Facilities.

#### Key CSR Focus Areas are as:

- Economic and Social Development of Indian Villages:
- Sustainable Manufacturing
- Infrastructure Development:
- Community Empowerment:
- Technology-Enabled Dairy Farming:
- STEM Education:

**Ankit Singh**

EHS Lead (Rockwell Automation India Pvt. Ltd.)

# Project Overview

## **Enabling Educational Infrastructure in Rural Schools (Ghaziabad & Greater Noida of Uttar Pradesh)**

As part of our commitment to sustainable community development, **Ummid Foundation - Hope for Human**, in collaboration with **Rockwell Automation India Pvt. Ltd.**, is implementing a targeted educational infrastructure enhancement project across twelve rural schools in the NCR region, specifically within the Ghaziabad and Greater Noida districts of Uttar Pradesh.

The primary objective of this initiative is to create a conducive, healthy, and technology-enabled learning environment for students in under-resourced areas.

**Lalit Singh Bisht**

**Founder Trustee**

**(Ummid Foundation - Hope for Human)**

### **The project comprises four core components:**

**Smart Classrooms Setup:** Each school will be equipped with Benchmark 65" Interactive Displays (Model: BENCHMARK L09FX0012240025), paired with UPS-powered backup units (Zebronics SR-ZCJ01PV06737) to ensure uninterrupted access to digital learning. This integration of technology is designed to make classroom learning more engaging and interactive, ultimately improving academic outcomes.

**Toilet Renovation and Sanitation Facilities:** Upgrading existing school toilet infrastructure is essential to maintaining hygiene standards. The project includes comprehensive renovation and refurbishment of toilet blocks, aiming to provide safe, functional, and gender-sensitive sanitation facilities to all students.

# Project Overview

**Safe Drinking Water Facilities:** To address health concerns related to water quality, the schools will be equipped with 40/80 litre **Stainless Steel Water Coolers** (80L storage / 40L/hr cooling capacity) & **RO System 100 LPH** with 100 L purification capacity. This ensures students have access to clean and safe drinking water, thereby reducing risks of waterborne diseases.

**Hygiene Training & Essentials Distribution:** In partnership with medical professionals, awareness and hygiene training sessions will be held for students. Additionally, hygiene kits will be provided, including: **Manual sanitary napkin vending machines (HH-Vend-50) with a storage capacity of 50 pads, Sanitary PAD (6 Months Stock)**, Hand sanitizers, hand wash, and basic hygiene supplies.

These efforts are geared towards improving both personal hygiene awareness and access to essential resources.

**Long-Term Vision:** This project is not just about infrastructure, it's a holistic approach that blends education, health, and sustainability. By transforming these rural schools into empowered learning environments, **we aim to:**

- Enhance academic performance
- Encourage school attendance, especially among girls
- Promote overall well-being of students
- Strengthen rural communities through quality education

The initiative is deeply aligned with SDG Goals focused on Quality Education, Good Health & Well-being, and Clean Water & Sanitation, thus contributing to long-term rural development

# ABOUT UMMID

Ummid Foundation - Hope for Human (TRUST) registered as per INDIAN TRUST ACT 1882 vide Trust Deed # 577/80 dated 07/02/2017.

Ummid Foundation - Hope for Human (TRUST) is an ISO 9001:2015 (QMS), certified Social Sectors. We are widely working for society from year 2017. We conducted social events in PAN India included Women Empowerment (self-reliance and financial independence), Education (Elementary Education), Skill Development, Agriculture (Natural Farming / Organic Farming, Environment Protection and Climate Change, Waste Management, GoGreen Products.

# PROJECT EXECUTIVE SUMMARY

**Ummid Foundation - Hope for Human** in collaboration with **M/s Rockwell Automation India** presents this project proposal with the aim of enhancing the educational infrastructure in twelve Rural Schools of NCR.

The initiative is focused on creating a conducive learning environment through the following activities:

**Establishment of Smart Classes:** The project seeks to equip schools with modern smart classrooms, integrating digital technology to improve the quality of teaching and foster interactive learning experiences.

**Renovation of School Toilets:** Recognizing the importance of hygiene and sanitation, the project will renovate and upgrade the existing school toilets, ensuring safe and clean facilities for students.

**Safe Drinking Water Facility:** Ensuring access to safe drinking water is a priority for the schools. The project will install reliable water filtration systems, promote students' health and reducing the risk of water-borne diseases.

**Hygiene Training Programs:** In collaboration with health professionals, hygiene training sessions will be conducted to educate students on personal hygiene practices. This will help in fostering a healthy environment within the schools. The Ummid Foundation will also provide basic hygiene products like Sanitary Napkins Vending Machine (50 Napkins Storage Capacity) with sanitary pads (Six months stock), sanitizer, hand wash etc. at schools.

Through these interventions, the project envisions transforming the selected schools into hubs of quality education, ensuring that students receive holistic support that encompasses academic, infrastructural, and health-related needs.

The initiative aligns with the broader goal of empowering rural communities by enhancing the educational ecosystem and promoting long-term sustainable development.

## Product Specifications:

1. Smart Class, Benchmark 65, Interactive Display BENCHMARK L09FX0012240025, UPS 650 Voltage Control unit UPS Power backup Control unit 650 Zebrronics SR-ZCJ01PV06737 with Five (5) years warranty.
2. Water Cooler 40/80 Ltr (Storage capacity 80 Ltd & Cooling capacity 40 Ltr per hrs with Stainless Steel 202 outer body and Stainless steel 304 internal tank material & RO System 100 LPH with 100 L purification capacity.
3. Manual Sanitary Napkin Vending machine, HH-Vend-50 & Sanitary PAD (6 Months Stock) & Hand sanitizers, hand wash, and basic hygiene supplies.

# Need of the PROJECT

After review of the current Status of Government Schools in Ghaziabad, Gautam Budh Nagar district especially area of Murad Nagar, Modi Nagar, and Greater Noida, Uttar Pradesh, the Ummid Foundation Hope for Human in collaboration with Rockwell Automation decided to develop the infrastructure of the school to increase the students' interest in school as the Government schools in the regions of Ghaziabad, Murad Nagar, Modi Nagar, and G B Nagar (Greater Noida) are facing significant challenges which impact the quality of education and student retention. Below is an overview of the current conditions, supported by recent data and reports.

1. A study conducted by Water Aid India (2022) in Uttar Pradesh found that a majority of rural schools lacked proper hand washing stations, sanitary napkin disposal, and waste management systems.
2. Girls in the age group of 10-14 often miss 4-5 school days every month due to lack of menstrual hygiene facilities, impacting academic performance and retention.
3. The COVID-19 pandemic has further exposed the digital divide, with rural children in Murad Nagar and Modi Nagar falling behind due to lack of devices, internet access, or digital classrooms.
4. While private schools in Greater Noida urban sectors moved to online or blended learning models, government schools in surrounding rural belts lacked even basic electricity in many cases.

There is a pressing need to upgrade and enable educational infrastructure in the rural schools of Murad Nagar, Modi Nagar, and Greater Noida to provide a safe, inclusive, and effective learning environment. This includes:

- **RENOVATION OF CLASSROOMS AND TOILETS.**
- **INSTALLATION OF SMART CLASS TECHNOLOGY.**
- **PROVISION OF DRINKING WATER AND SANITATION.**
- **DISTRIBUTION OF EDUCATIONAL KITS AND HYGIENE MATERIALS.**

**The major reasons are infrastructure and facilities specially the basic amenities:**

**Basic Amenities Lacking:** Many government schools in these districts lack essential facilities, including:

- Modern Facilities (Smart Class etc.)
- Clean Drinking Water Facilities
- Adequate desks and benches
- Regular cleaning Staff

These deficiencies hinder the learning environment and student well-being

The Government schools in Murad Nagar, Modi Nagar (Ghaziabad) and G B Nagar (Greater Noida) continue to face significant challenges. Addressing infrastructure deficits, improving teacher availability, and ensuring consistent instructional practices are essential steps toward enhancing the quality of education in these regions. This project aligns with national priorities under Samagra Shiksha, NEP 2020, and offers an opportunity to uplift rural education through collaborative, community-driven, and CSR-supported interventions.

# BASELINE SURVEY

**Based on this Ummid Foundation - Hope for Human conducted Baseline Survey in more than 50 to 60 schools of these districts and selected 12 schools for implementation of M/s Rockwell Automation India CSR project on “Enhancing Sanitation and Educational Infrastructure in Government Schools”.**

The initiative was launched following a comprehensive baseline survey conducted by the Foundation's field team.

In coordination with the Basic Shiksha Adhikari (BSA), the Foundation received a list of over 50 schools. However, the team prioritized need-based selection over prescribed proximity-based recommendations. A thorough assessment of school conditions revealed that many institutions lacked basic amenities - functional toilets, clean water sources, and menstrual hygiene support-leading to high absenteeism among girl students.

Ummid Foundation selected 12 Schools in Rural Remote Locations, often over 60 to 110 kilometers from main towns, which presented significant logistical challenges, including road connectivity, Labor Shortages and limited access. Despite these difficulties, the Ummid Foundation successfully executed the following interventions:

The project achieved substantial results: Attendance increased by 20 to 30%, hygiene awareness improved, and the overall school environment became more conducive to learning.

The engagement of community stakeholders, including teachers and parents, ensured sustainability and ownership of the improvements.

This project not only bridged the infrastructure gap but also reinstated the confidence and dignity of adolescent girls in these underserved areas. It stands as a model for need-based, impact-driven CSR initiatives that directly transform grassroots educational ecosystems.

# BASELINE SURVEY

## Survey Execution Team:

A dedicated field team from Ummid Foundation conducted the baseline survey, including focused group discussions, one-on-one interviews, and observational visits to schools.

## The team engaged:

- Block and District Education Officers (notably the BSA Officer)
- Headmasters, teachers, parents, and students (particularly girl students)

## Key Steps Taken:

### Initial Coordination Meeting.

The team held a meeting with the Basic Shiksha Adhikari (BSA) and received a list of over 50 government schools recommended for intervention.

### School Selection Criteria and Finalization

After assessing the facilities and needs, 12 schools in extreme remote areas (more than 80 to 140 km from main townships) were finalized for the intervention.

# BASELINE SURVEY

## These Schools:

- Had little or no basic infrastructure.
- Faced issues in sourcing labor for construction due to remoteness.
- Were completely ignored in previous development initiatives.

Despite these challenges, the Foundation accepted the task and proceeded with full commitment.

Duhai is a village in Ghaziabad district in Uttar Pradesh. Village Duhai is situated on Delhi - Meerut road (NH 58) approx. 5km from Ghaziabad. Duhai had access to public bus service, private bus service and railway station.

# SCHOOL VISITS AND NEED ASSESSMENT

Despite pressure to select nearby or prescribed schools, Ummid Foundation - Hope for Human chose to prioritize need-based selection. Each school was evaluated on:

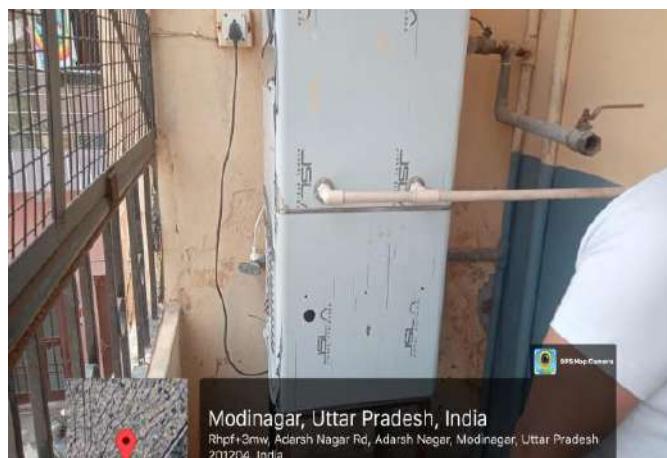

- Availability of clean drinking water
- Functional condition of toilets (Girls & Boys)
- Menstrual hygiene facilities
- Attendance patterns of students
- Geographical remoteness and infrastructure challenges

**Critical Observations:**

- Several schools had only hand pumps for drinking water, some of which were non-functional.
- In many schools, no separate or functional toilets were available for girls/boys.
- Attendance records showed reduced presence of girls during their menstruation period, linked to the lack of hygiene facilities.

## WELCOME RECOGNITIONS OF TEAM ROCKWELL

## INAUGURATION

# FOCUS GROUP DISCUSSION (FGD)

## Findings Teachers:

- Reported improved student attendance and concentration attributed to better sanitation facilities.
- Emphasized the need for ongoing maintenance and periodic training on hygiene practices.

## Students:

- Expressed increased comfort and dignity, especially among female students, due to improved toilet facilities.
- Showed enthusiasm for participating in hygiene clubs and peer-education programs.

## Parents:

- Noted a positive change in children's hygiene habits at home.
- Expressed willingness to support school maintenance through community efforts.

As part of the project "Enhancing Sanitation and Educational Infrastructure" in government schools of Ghaziabad and Gautam Budh Nagar districts, a significant intervention was the installation of sanitary pad vending machines and disposal units in girls' toilets.

The Focus Group Discussions (FGDs) with girl students' post-installation revealed several positive outcomes:

**Key Outcomes Identified Through FGDs****1. Improved Attendance and Participation:**

Many girls reported a reduction in absenteeism during menstruation. Students felt more confident to attend school regularly, even during their menstrual cycles. Teachers observed increased participation of girls in physical and classroom activities.

**2. Enhanced Sense of Dignity and Comfort:**

Girls expressed relief and dignity in having easy access to sanitary pads during emergencies. The vending machines provided a discreet and stigma-free solution within the school premises.

**3. Increased Awareness and Hygiene Practices:**

FGDs indicated an improved understanding of menstrual hygiene management (MHM) among students. Students learned about safe disposal practices using incinerators, contributing to a cleaner and more hygienic school environment.

**4. Boost in Self-Confidence and Emotional Well-Being:**

Girls shared that they felt empowered and supported by their school environment. The availability of pads reduced stress and anxiety related to menstruation in school hours.

**5. Peer Support and Openness:**

Girls were more open to discussing menstruation and supporting each other. Some students expressed a desire to form hygiene clubs or peer-led awareness groups for menstrual health education.

**6. Parental and Community Feedback:**

Indirect feedback through FGDs showed that parents felt reassured knowing their daughters had access to necessary hygiene facilities in school. There was a noticeable reduction in social taboos around menstruation discussed in the family setting.

## Other Outcomes

- **Infrastructure Improvements:** Sanitation facilities were constructed or renovated in 12 schools, benefiting over 6000 Students.
- **Enhanced Hygiene Practices:** Regular hand washing and cleanliness routines were adopted in schools.
- **Community Engagement:** Active participation of parents and local communities in school activities and maintenance.
- **Educational Impact:** Improved student attendance and engagement observed post-intervention.

The FGDs with girl students' post-installation of sanitary pad vending machines highlighted a transformative shift in their school experience. The initiative not only addressed a critical need but also contributed to creating a safe, inclusive, and supportive educational environment for adolescent girls. These insights reinforce the importance of integrating menstrual hygiene management into broader school sanitation programs.

## HANDHOLDING PROCESS

### Achievements and Interventions

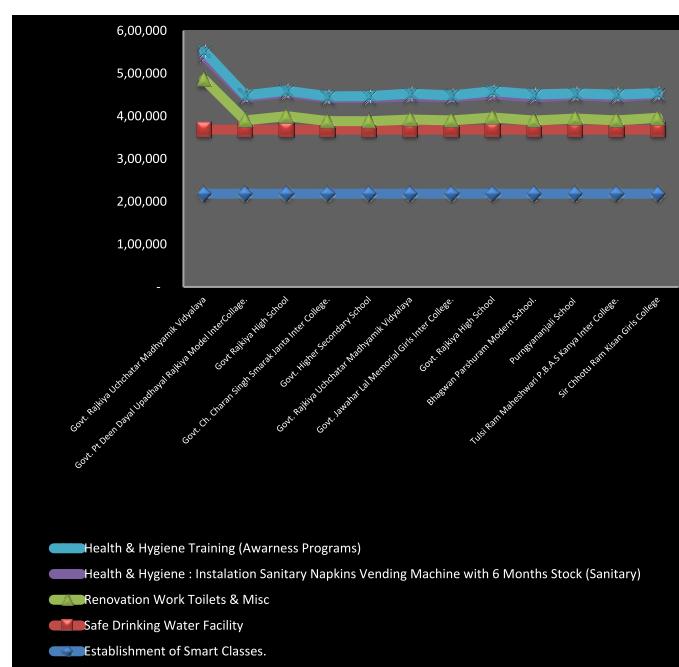

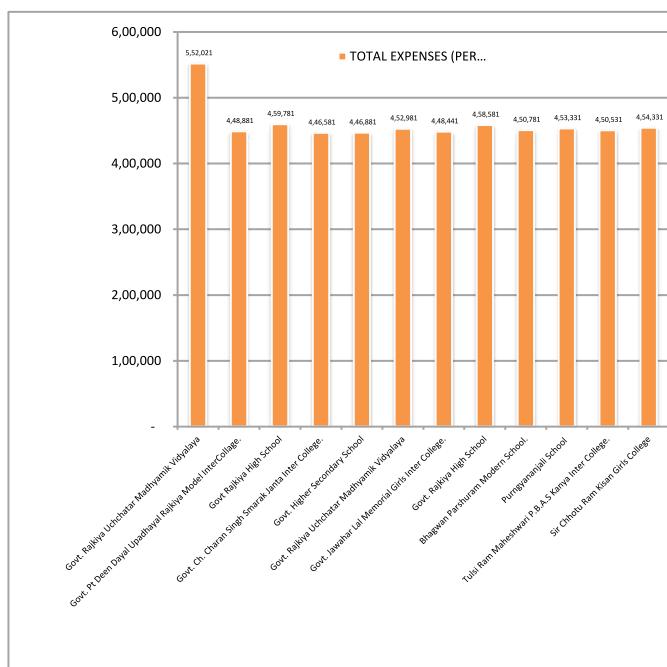

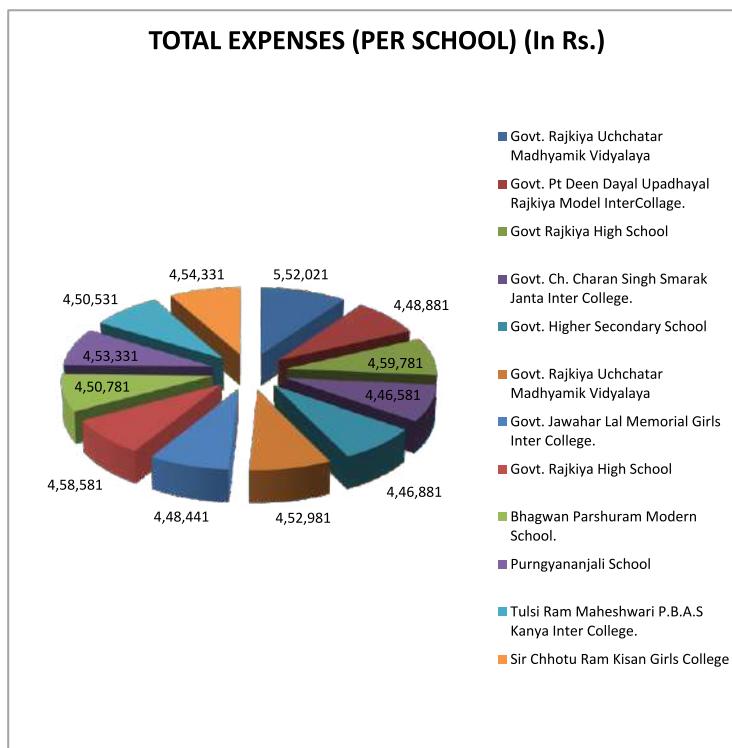

The following infrastructure improvements and installations were completed **IN 12 SCHOOLS**

Component	Achievement
<b>Establishment of Smart Classes</b>	Smart Class, Benchmark 65, Interactive Display BENCHMARK L09FX0012240025, UPS 650 Voltage Control unit UPS Power backup Control unit 650 Zebronics SR-ZCJ01PV06737 with Five (5) years warrantee.
<b>Sanitary Pad Vending Machines</b>	Installed one Vending Machines Manual Sanitary Napkin Vending machine, HH-Vend-50 along with 6 months stock of Sanitary Pad
<b>Drinking Water Facilities</b>	Water Cooler 40/80 Ltr (Storage capacity 80 Ltd & Cooling capacity 40 Ltr per hrs with Stainless Steel 202 outer body and Stainless steel 304 internal tank material.
<b>Toilet Renovation</b>	Renovated or constructed toilets (Girls & Boys) in all schools
<b>Student Engagement</b>	Awareness sessions on hygiene & MHM
<b>Community Engagement</b>	Conducted with teachers & parents (FGD)

## PROJECT FINANCIAL

# IMPACT

Establishment Smart Boards are having a positive impact on government schools by enhancing the learning experience, increasing student engagement, and providing access to a wider range of educational resources. They facilitate active learning, cater to diverse learning styles, and promote collaboration among students.

## Enhanced Learning Experience

- Interactive and Engaging:** Smart boards allow for interactive lessons, making learning more enjoyable and memorable for students.
- Visual and Auditory Learning:** They cater to different learning styles by providing visual aids, multimedia presentations, and audio support.
- Improved Retention:** The engaging nature of smart board lessons can lead to better knowledge retention.
- Access to Resources:** Smart boards provide access to a vast array of online resources, including e-books, educational videos, and interactive content, expanding learning opportunities beyond the traditional curriculum.

## Increased Student Engagement

- Active Participation:** Students are more likely to participate in interactive activities and discussions when using smart boards.
- Collaborative Learning:** Smart boards facilitate group work and collaborative projects, fostering communication and teamwork skills.
- Focus and Attention:** Smart boards can help students stay focused and on task, especially when used for engaging activities.

# IMPACT

## Other Benefits:

- **Reduced reliance on paper:** Digital content reduces the need for physical textbooks and worksheets, promoting an eco-friendly approach.
- **Improved classroom management:** Smart boards can be used to display classroom rules, schedules, and assignments, contributing to a more organized and efficient learning environment.
- **Bridging the urban-rural gap:** Smart boards can deliver quality education to students in remote areas by providing access to digital content and resources

## Installation of Water Cooler & RO (Safe Drinking Water Facilities)

Providing safe drinking water facilities in government schools has a significant positive impact on students' health, attendance, and academic performance. It reduces waterborne illnesses, improves concentration, and can lead to better overall development and learning outcomes.

## Improved Health and Reduced Illness:

- **Prevention of Waterborne Diseases:** Safe drinking water helps prevent diseases like diarrhea, cholera, and typhoid, which are often contracted from contaminated water sources.
- **Reduced Absenteeism:** When students are healthy, they are less likely to miss school due to illness, leading to better attendance rates.
- **Better Concentration:** Improved health also translates to better focus and concentration in class, allowing students to learn more effectively.

## Positive Impact on Learning:

- **Increased Attendance:** Fewer sick days mean more time spent in the classroom, contributing to better academic performance.
- **Enhanced Learning Outcomes:** When students are healthy and present, they are better able to absorb information and participate in learning activities, leading to improved academic achievement.
- **Reduced Burden on Girls:** In many communities, girls are often responsible for fetching water. Having safe water sources at school reduces this burden, allowing them to focus on their education.

# IMPACT

- **Better Overall Development:** Safe drinking water is essential for overall childhood development, contributing to physical and cognitive growth.
- **Improved Hygiene:** Access to safe water encourages better hygiene practices, such as hand washing, which further reduces the spread of infections.
- **Positive Social Impact:** Clean water initiatives in schools can also raise awareness about hygiene and sanitation, promoting positive behavioural changes within the community.

## Installation of Sanitary Napkin Vending Machines

Sanitary napkin vending machines in government schools have a positive impact by increasing girls' attendance, improving hygiene, and reducing the stigma associated with menstruation. These machines provide easy access to sanitary products, allowing girls to manage their periods with dignity and continue their education uninterrupted.

## Positive Impacts:

- **Reduced Absenteeism:** When girls have access to sanitary pads, they are less likely to miss school during their menstrual cycle, leading to improved attendance and academic performance.
- **Improved Hygiene:** Vending machines ensure a readily available supply of sanitary napkins, promoting better hygiene practices and reducing the risk of infections.
- **Increased Awareness:** The presence of vending machines can spark conversations about menstrual hygiene and break down the taboo surrounding periods, fostering a more open and supportive environment.
- **Empowerment and Confidence:** Having access to sanitary products empowers girls to manage their periods with confidence and participate fully in school activities, including sports and extracurriculars.

# IMPACT

- **Reduced Dropout Rates:** By addressing a key barrier to girls' education, vending machines contribute to reducing dropout rates, especially in marginalized communities.

## Testimonials

## Recommendations

**Regular Maintenance:** Establish school committees involving teachers, parents, and students to oversee the upkeep of facilities.

**Continuous Education:** Integrate hygiene education into the school curriculum and conduct regular workshops.

**Scaling Up:** Explore opportunities to replicate the model in other districts with similar needs.

**Monitoring and Evaluation:** Implement a robust M&E framework to assess long-term impacts and inform future interventions

# IMPACT

# IMPACT

## Conclusion:

The baseline survey was crucial in identifying the real needs of underserved schools. Ummid Foundation, with M/s Rockwell Automation's support, succeeded in transforming the learning environment in 12 of the most neglected schools in Ghaziabad and Gautam Budh Nagar.

The project not only improved infrastructure but also restored dignity, confidence, and equal learning opportunities for hundreds of rural students.

The Ummid Foundation Hope for Human project successfully demonstrated the positive impact of collaborative efforts in enhancing school infrastructure and promoting hygiene practices. The active involvement of teachers, students, and parents through FGDs ensured that the interventions were community-driven and sustainable. The project's success serves as a model for similar initiatives aiming to improve educational environments and student well-being.

## सरकारी स्कूलों में आधुनिक शिक्षा उपलब्ध कराने का उद्देश्य: ललित बिष्ट

## COMMENTS - SCHOOL PRINCIPAL

Thanks to Ummid Foundation - Hope for Human, a dream has come true for our village school. They transformed our traditional classroom into a smart learning environment. Their team renovated broken toilets, ensuring dignity and health for our girls and boys alike. Clean water, hygiene awareness, and educational upliftment—all brought here with compassion and commitment. This is the first time any NGO worked with such sincerity on ground level."

**Principal Smt Tanuja Sharma - Govt. Higher Secondary School, Kuhsaliya Dasna, Ghaziabad**

For years, we hoped someone would genuinely understand our school's needs. When other organizations visited, we were left with only promises. But Ummid Foundation - Hope for Human, brought real change. For the first time, our children saw a smart TV, experienced clean toilets, and had access to RO drinking water. Their dedication to creating hygienic, engaging, and modern classrooms in such a remote location fills our hearts with gratitude."

**Principal Dr. Sangeeta Sharma - Tulsi Ram Maheshwari P.B.A.S Kanya Inter College, Modinagar Ghaziabad**

Our girls now feel safe, respected, and valued. With UMMID Foundation's initiative, we have functioning toilets, safe drinking water, and smart boards that excite and engage our students. The hygiene awareness they brought in is reflected in our children's daily habits. Their ground-level work has created a model of hope and dignity that we had long been waiting for."

**Principal Smt Sushma Sharma - Govt Rajkiya High School, Noorpur, Murad Nagar Ghaziabad**

## COMMENTS - SCHOOL PRINCIPAL

We had given up hope of development due to our school's remote location. Many visited, none acted. UMMID Foundation didn't just act—they listened, understood, and delivered. From smart classrooms to safe sanitation and hygiene sessions for children, their work has not just changed infrastructure but also the mindset of our students. Parents are now more confident in sending their children to school."

**Principal Smt Ruchi Sharma - Govt. Rajkiya Uchchatar Madhyamik Vidyalaya, Atrauli, Ghaziabad**

"In our remote village, no one believed change could come. But the UMMID Foundation turned that belief into reality. They transformed our school with proper sanitation, clean drinking water, and digital education tools. The joy in our students' eyes when they saw a smart TV for the first time is unforgettable. Their work is not just infrastructure—it is transformation."

**Principal Smt. Vandana Rastogi - Govt. Rajkiya High School, Matour, Ghaziabad (UP)**

Ummid Foundation - Hope for Human, has done what others only spoke of. They brought technology, hygiene, and clean water into our school and empowered our students in unimaginable ways. For many kids, it was the first time they saw a screen that wasn't a mobile phone, used a clean washroom, or drank filtered water. Their work isn't just social—it's soul-touching. We are deeply grateful."

**Principal - Mr Sunil Kumar - Govt. Ch. Charan Singh Smarak Janta Inter College, Patla, Murad Nagar Ghaziabad (UP)**
